

**Re: CFS membership referendum at the University of Regina**

This letter is written in response to an e-mail entitled 'Timing of CFS results release convenient and suspicious' circulated yesterday by the University of Regina Students' Union (URSU). This release comes following months of the Executive of the URSU refusing attempts by our Federation to release the results of a referendum held in October 2010, amongst the individual members of the Canadian Federation of Students at the University of Regina on membership in our Federation.

In the referendum, students at the University of Regina voted to remain members of the Federation. The results were as follows:

In favour of continued membership:	1,414
Opposed to continued membership:	1,326

Following the close of polls, results were embargoed until the eligibility of a small number of voters could be determined. This included URSU members studying at the First Nations University of Canada who the URSU Executive sought to disenfranchise. The remaining ballots were counted on December 17, at which point the URSU and the Federation agreed to release the results in a timely manner.

In the nearly three months since, the Executive of the URSU has refused to allow its members to be informed of the results, instead making its consent contingent on the Federation paying URSU legal bills and agreeing to various unrelated demands being made by the URSU.

The Federation's members at the University of Regina and across the country have a right to know the results and the Federation will not allow the Executive of the URSU to impede the release of the results. While the Federation encouraged the Executive of the URSU to agree to a joint release, the URSU refused, leaving the Federation with no choice but to release the results on its own.

The attempt to prevent the release of the results are another inappropriate intrusion by the URSU Executive into the Federation's democratic processes, and a not particularly subtle way to divert attention from the fact that, despite spending significant resources opposing membership, its member students voted for unity.

Finally, the URSU Executive's accusation that the timing of the results is politically motivated is baseless and a continuation of its campaign to prevent students at the University of Regina from learning the results of the referendum before the conclusion of the current academic year.

Please feel free to contact me should you have any questions.

In solidarity,

David Molenhuis
